# Health Coverage: State-to-State 2025

October 2025

AHIP's **Health Coverage: State-to-State** details the important role health plans play in all 50 states and Washington, D.C. This report catalogues what health plans contribute in terms of:

- Access to health care coverage
- Number of jobs the industry generates, both directly and indirectly
- Tax revenues paid to support the local economy

Data for this report were compiled from various sources (please see end of the report for a detailed list) and represents the most recent and complete information available. Due to the different schedules of the organizations' reporting cycles, some data are less recent than others.

# Sources & Notes

## 1. SOURCES:

### Access to Insurance - Large Group, Small Group and Individual Covered Lives (All States)

National Association of Insurance Commissioners. 2023 Supplemental Health Care Exhibit Report. Volume I. Washington, DC. 2024. Available at https://content.naic.org/sites/default/files/hcs-zb-22.pdf (accessed on May 21, 2025). The NAIC does not endorse any analysis or conclusion based upon the use of its data.

### Large Group, Small Group and Individual Covered Lives (CA only)

California Department of Managed Health Care, Enrollment Summary Report 2023. Available at http://www.dmhc.ca.gov/DataResearch/FinancialSummaryData.aspx (accessed on May 21, 2025).

**NOTES**:

Large group covered lives were calculated as domestic comprehensive health coverage policies issued to large group employers as of 12/31/23. This includes Federal Employees Health Benefit Plan, TRICARE and similar insured state and local fully insured programs, but does not include the self-funded coverage.

Small group covered lives were calculated as domestic comprehensive health coverage policies that were issued to small groups as of 12/31/23. AHIP used the NAIC's definition of a "small group plan", which is defined as a health plan offered in the small group market as such term is defined in the state law. Small group definitions may vary across states.

Individual covered lives were calculated as comprehensive health coverage policies that were issued to an individual covering the individual and/or their dependents in the United States' individual market as of 12/31/23. Group conversion policies are also included, as defined in NAIC Group Insurance Mandatory Conversion Privilege Model Act #105.

Most of the California health insurance plans report their enrollment statistics not to NAIC, but to state agencies. We report California statistics for large group, small group and individual covered lives using combined data from the NAIC and the California Department of Managed Health Care. For large groups the reported statistic represents the number of enrollees receiving health insurance from an employer with 51 or more workers. For small groups, the reported statistic represents the number of enrollees receiving health insurance from an employer with 50 or fewer workers.

**NOTES:**

AHIP Center for Policy and Research calculated the state-level fully-insured group enrollment statistics by using the NAIC and California Department of Managed Health Care enrollment data (see the endnote 1 for details). These statistics were combined with the American Community Survey estimates of the total employer-based coverage to calculate the state-level estimates of self-insured covered lives. The NAIC does not endorse any analysis or conclusion based upon the use of its data.

**NOTES:**

Coverage is defined using the following hierarchy:

"Medicaid" Includes those covered by Medicaid, Medical Assistance, Children's Health Insurance Plan (CHIP), or any kind of government-assistance plan for those with low incomes or a disability, as well as those who have both Medicaid and another type of coverage, such as dual eligibles.

"Medicare": Includes those covered by Medicare, Medicare Advantage, and those who have Medicare and another type of non-Medicaid coverage where Medicare appears to be the primary payer. This category does not include seniors reporting employer-sponsored coverage and full-time work, and those covered by Medicare and Medicaid (dual eligibles).

"Private" includes those covered by employer-sponsored coverage either through their own current or prior job or as a dependent in the same household, as well as individuals/families that purchased or are covered as a dependent by a non-group insurance.

"Other" includes those covered under the military or Veterans Administration.

"Uninsured" includes those without health insurance and those who have coverage under the Indian Health Service only.

## 9. TOP 5 LARGEST HEALTH PLANS BY NUMBER OF COVERED LIVES - COMMERCIAL, FULLY-INSURED (ALL STATES)

**SOURCES:**

National Association of Insurance Commissioners. 2023 Supplemental Health Care Exhibit Report. Volume I. Washington, DC. 2024. Available at https://content.naic.org/sites/default/files/hcs-zb-22.pdf (accessed on May 21, 2025). The NAIC does not endorse any analysis or conclusion based upon the use of its data.

**Commercial, Fully-Insured (CA only)**

California Department of Managed Health Care, Enrollment Summary Report 2023. Available at http://www.dmhc.ca.gov/DataResearch/FinancialSummaryData.aspx (accessed on May 21, 2025).

**NOTES:**

Each state's commercial market size was calculated as a sum of large group, small group and individual enrollment as reported by the NAIC.These enrollment statistics reported by the NAIC do do not include the self-funded coverage.

Most of the California health insurance plans report their enrollment statistics not to the NAIC, but to state agencies. Thus, the combined enrollment statistics from the NAIC and the California Department of Managed Health Care were used to determine five largest commercial health plans by enrollment.
